neo β +

neoJr+

neo's Certification Test is a powerful assessment tool that provides reliable confirmation of student fluency levels, and is reserved for students completing a **CEFR** level in a neo programme. The Certification Test results and the **CEFR** (Common European Framework of Reference) Certificates the students earn are recognised around the world.

The **Certification Test** is fixed-length, 25 questions test per CEFR+ level. Questions are drawn from a pool of test items prepared for each level, and assess the concept, function, structure, and vocabulary items. Students who pass can download their **CEFR Certificates**. Students who fail need to study Artificial Intelligence-curated **Review Lessons**, which should be completed before retaking the **Certification Test** a second time.
