

Advanced AI Technology For Adult English Language Learners

Proven. Fluency. Guaranteed.

What is neo+?

neo+ is a proven learning solution that combines online self-study with one-on-one coaching to meet your company's English-fluency goals. With neo+, adult learners won't waste valuable time traveling away from work or family. They can study on their mobile device at any time, in short sessions of no more than 30 to 45 minutes, a few times a week. Learners can also study more often to progress faster.

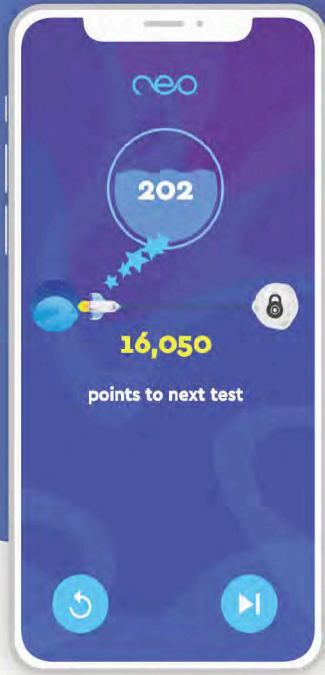

Whatever your organization's English goals are, neo+ adapts to the needs of every learner. Learners start by identifying their current skill level by taking neo's online **Assessment Test**, which is branded with your organization's logo. The results allow you to make sound business decisions and help you get each staff member to the English fluency level their job requires, backed by our price guarantee.

Why choose neo+?

- **Goals you can measure**
neo+ helps you establish clear and measurable English-language learning goals for individuals or by department.
- **Online Assessment Test**
Verify your staff's current English skill level with our online, cloud-based adaptive testing platform. We host the platform, but you can customize the testing page with your logo. You can be up and running and ready to evaluate your staff with your own URL in minutes.
- **Conversation Skills**
neo Live includes speaking activities with neo coaches, helping learners develop strong conversational skills.

English learning for all skill levels

neo+ offers 11 skill levels for learners 15 years old and above. Each learner can purchase as many or as few levels as they need. Levels start at Pre-A1 for those with no previous knowledge of English and end with C1-Bridge for those who want to acquire truly advanced English skills.

Powerful study app

The neoStudy App delivers English language learning to adult learners in a way that makes sense to them, using their understanding of the world around them to develop English fluency. Powered by DynEd's lessons and certification program, and backed by 35+ years of data from over 25 million learners globally who have successfully learned English with our programs, neo+ guarantees improved English fluency at every certification level.*

Online coaching

Our trained coaches will meet online with your staff to develop your learners' English speaking skills. Thanks to neo's advanced AI technology, coaches can specifically address any problem areas learners face during the self-study sessions. neo feeds this information to the coach before every coaching session ensuring students reach each level's requirements successfully.

International skill certification

neo+ certificate levels are aligned with the Common European Framework of Reference for Languages (CEFR). In order to move from one CEFR level to the next, learners must successfully complete a series of mastery tests within each level. Once the learner has mastered all necessary language concepts for their CEFR level, neo will automatically open the appropriate Certification Test. Learners earn a DynEd certificate when all tests are successfully completed. It takes three months or less to go through each certification level.

Monthly reports

Receive monthly reports to stay on top of your staff's progress.

Backed by over 30 years of success

Comprehensive system with data from 25+ million students from around the world.

Advanced Technologies

AI and Speech Recognition Technology work together for powerful results.

* Our price guarantee is based on real outcomes for a period of study of 90 days or less per level. If a student takes longer to complete a level, the price will not change.
